METHOD AND SYSTEM FOR PUBLISHING AN ELECTRONIC FILE ATTACHED TO AN ELECTRONIC MAIL MESSAGE

Am 10 TECHNICAL FIELD

13/3
8/11/2006
See attachment
15 The present invention is generally directed to viewing content associated with an electronic file attached to an electronic mail message. The invention supports publication of content associated with an electronic file attachment by launching a file attachment, thereby resulting in the execution of computer instructions that launch a browser program which displays the content at a web site identified by the file attachment.

20 BACKGROUND OF THE INVENTION

Electronic mail programs are used by business and residential users to communicate information contained within the body of an electronic mail message or attached as an electronic file or document to the electronic mail message. For example, a user can save a
25 business report as an electronic document prepared by a word processing program and attach this electronic document to an e-mail message for distribution to designated recipients. Another representative example is the transmission of an electronic mail message having an attached multi-media presentation file, such as a Microsoft "POWERPOINT" slide
30 show, to designated recipients at physically remote locations. Users of electronic mail programs commonly use electronic mail messages as a carrier mechanism for forwarding electronic files or documents via a computer network to one or more designated recipients.

Although the combination of an electronic mail program
35 and a distributed computer network provides an efficient communication system for communicating with multiple parties, the capacity of this electronic mail system to support communications can be degraded by the transfer of messages having large-sized attachments. Electronic mail
